The Polaroid OneStep SX-70 camera, which was released in 1977, is credited with bringing instant photography to many households worldwide. The camera's rainbow colors made it an instant hit and it remains popular to this day. In fact, you can even get a Lego version of the camera, called the Lego Ideas Polaroid OneStep SX-70 Camera, which is made up of 516 Lego pieces. The Lego set is a **replica** of the iconic Polaroid camera and is based on a project designed by a Lego fan who goes by the name of Marc, also known as "Minibrick Productions" online. Marc said he started designing the project while on holiday in France and it took him over a month to complete.

What is the purpose of the Lego Ideas Polaroid OneStep SX-70 Camera set?

The Lego Polaroid camera is an almost perfect copy of the original Polaroid camera. It includes a viewfinder you can look through, a dial to change the light in your photos, and a shutter button you can press. However, there is one important difference: the Lego Polaroid camera doesn't actually take real photos. Instead, the set comes with a model of a Polaroid film pack and three toy "photos," including a Lego-style image of Polaroid's founder, Edwin Land. The photos can be put into the camera and pop out when the shutter button is pressed.

What sets the Lego Polaroid apart from the Polaroid OneStep SX-70 camera?

The Lego Ideas Polaroid OneStep SX-70 Camera is a product of Lego Ideas, a website where fans can share what they've made and suggest ideas for future Lego sets. The Lego set is now available in stores and is priced at \$79.99 US. The camera is a **tribute** to the iconic Polaroid camera and its impact on photography, fashion, and culture. The Polaroid OneStep SX-70 camera was innovative for its time and was renowned for its portable design and use of SX-70 film to create instant photographs. Its **retro** design and white color scheme made it a beloved tool among both **amateur** and professional photographers.
